

# Stool For Rotavirus, Collection Instructions

---

1. Collect approximately one ml of liquid stool or approximately a pea sized portion of formed stool into a clean, dry container with no preservatives.
2. Tighten the cap on the container and **REFRIGERATE**.
3. Write the patient's name, date and time the stool was collected on the label.
4. Return to a Weland Clinical Laboratories site within **72 HOURS** of collection.
